a wall structure;

1. (Amended) A low depth tray for bottles, comprising:

a first pair of opposed walls;

a second pair of opposed walls attached to the first pair of opposed walls to form

a base attached to the wall structure;

a plurality of interior divider walls extending upwardly from the base; and

at least one interior member projecting upwardly from an interior of the wall structure and connected to the divider walls, the at least one interior member having a height less than the height of the wall structure and less than the height of bottles loaded in the tray,

wherein the at least one interior member, the base, the divider walls, and the wall structure define a plurality of bottle retaining pockets which are each sized to receive a single bottle therein.
